**DETAILED ACTION**

***Ex Parte Quayle***

1. This application is in condition for allowance except for the following formal matters:

2. The abstract of the disclosure is objected to because.

Abstract contains title. Applicant is requested to remove first line (title). Also, Specification , page 1; Abstract and Claims, page 12, contain "[30020382 US]", possibly a header. Applicant is requested to remove the same.

Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:  
(1) if a machine or apparatus, its organization and operation;  
(2) if an article, its method of making;  
(3) if a chemical compound, its identity and use;

- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

***Allowable Subject Matter***

3. Claims 1-15 are allowable over the closest prior art of record.

The following is a statement of reasons for the indication of allowable subject matter: The closest prior art of record, EP 0738091 A1 (Clarke et al.- Hewlett-Packard Company) and EP0851700 A1 (Abbadessa et al. - Hewlett-Packard Company) recite monitoring signaling messages and selecting a pair of signaling messages according to predetermined selection criteria but fails, alone or in combination, to disclose the unique method steps of predetermining characteristic of a message in protocol, monitoring signaling link to determine if predetermined characteristic is present and identifying the signaling link (claims 1 and 10).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Afsar M. Qureshi whose telephone number is (571) 272 3178. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Field Lynn can be reached on (571) 272 2092. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
